
Mast support for the canvas cover in the winter

I use the mast to support the canvas cover.

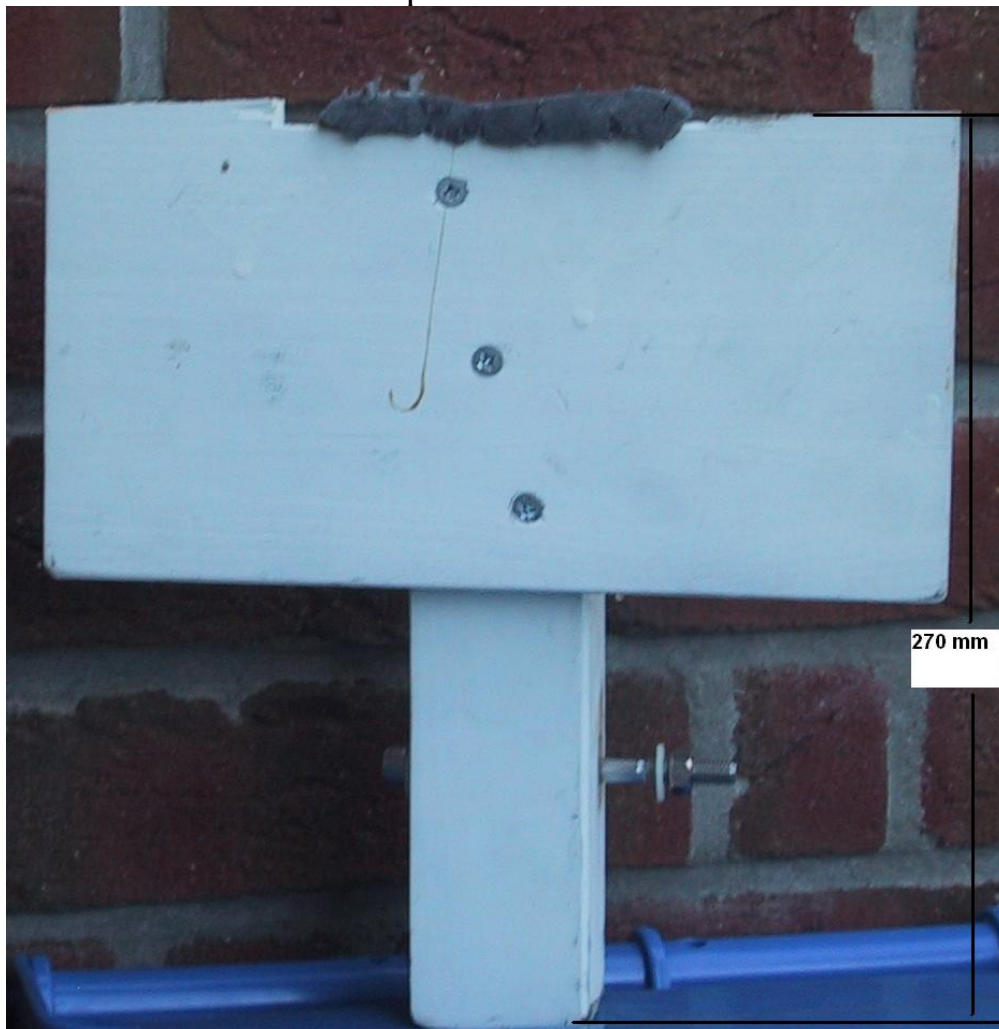

The mast is supported three times.

1. Pulpit

Here is the mast supported by a squared timber 100 x 100 mm

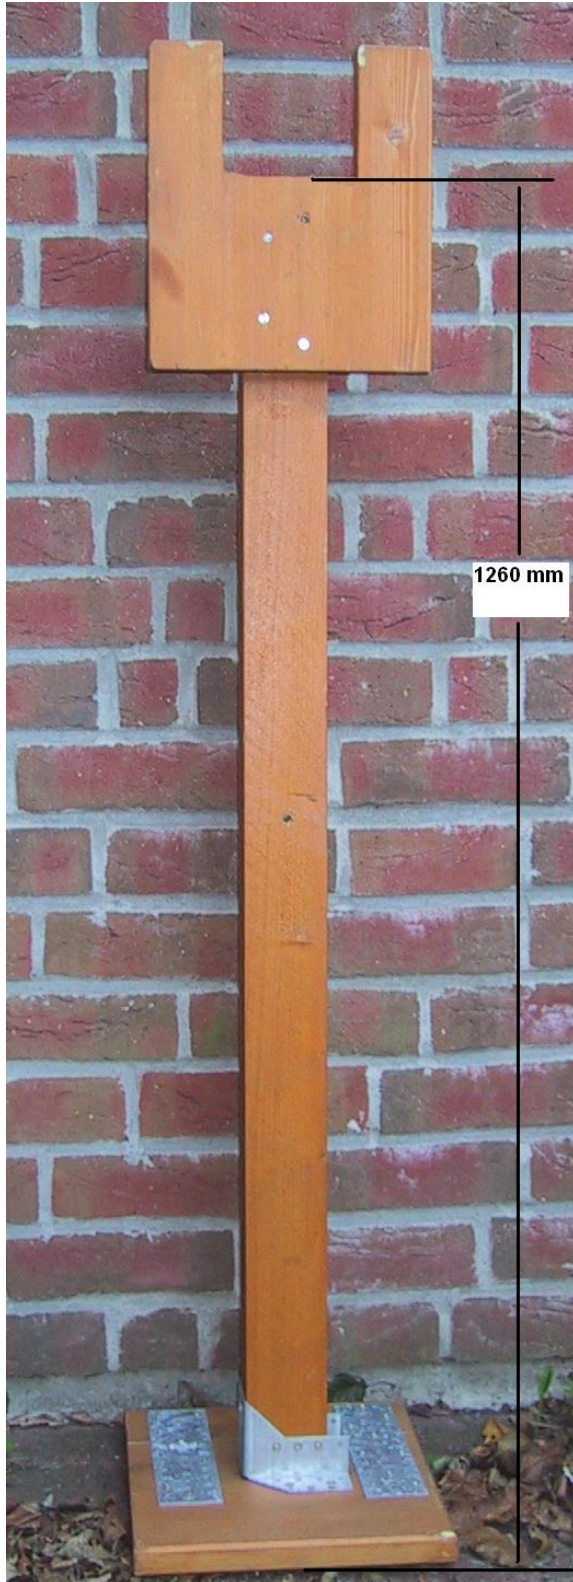

2. Mast step

To be fitted at the Mast step

3. At the bottom of the cockpit

Stays on the bottom of the cockpit

Important: This brace must be secured against fall over with two ropes from the mast to the cleats at the stern.
